Guide to working with Python notebook.

- 1. Download the "Masterclass_cosmic_ray_activity.ipynb" file shared with you.
- 2. Open Google Colab notebook linked to your google drive. The link is https://colab.research.google.com
- 3. You will need to login to your own google drive account to run google collar.
- 4. Once you login, In the dialog box click on Upload and upload the "Masterclass_cosmic_ray_activity.ipynb" file.
- 5. Click on the uploaded file to get the ipython notebook. (Link to better understand ipython notebook https://jupyter-notebook-beginner-guide.readthedocs.io/en/latest/)
- 6. You can run the individual cells by clicking on the play button on the left side of the cells or using the Runtime function above.
